

ELIOS

HIDDEN DEPTHS

Elios is a range of slender and versatile chairs that are equally at home in meeting rooms, seminar and conference facilities, training rooms or restaurants. Moving seamlessly from one area to another in any location, this high density stacking chair is light both visually and physically. Elios can

achieve a stack of 40 un-upholstered chairs on its trolley, fitting comfortably through a standard doorway.

The curvaceous contoured form of both the seat and back achieve excellent comfort as well as adding to the pleasing aesthetics and

universal appeal of this design. It's the little things it does that make the difference, the way the seat and back moldings encapsulate the frame, the way the arm cantilevers from the back and the detachable writing tablet to name a few.

DESIGN

Senator

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimise the impact on the world around us.

They come from all over the world, but are based in our Design Center located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test center and prototyping lab.
