

ARRAY

With every Senator design comes a great deal of thought.

The design process begins way before pencil reaches paper, we begin by looking at you. We look at how you sit, reach, move, and work,

to create a design that not only looks beautiful but is a pleasure to use too.

Whether you're focusing, collaborating, presenting or organizing, behind every Senator product is a fusion of intelligent

thinking and innovative engineering to create products that help support people in their everyday life.

Array is no different. A multi-use flip top table, available in 2 base styles, delivering on any task and suitable for any audience.

DIMENSIONS

DESIGN

Senator

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimize the impact on the world around us.

They come from all over the world, but are based in our Design Center located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test center and prototyping lab.

STANDARD FEATURES (*Selected models only)

- Rigid cast aluminum frame
- Full integrated cable management
- Fully lockable brake casters
- Nesting capabilities
- Gas assisted lift operation
- Single handle to unlock
- Integrated flexible swipe-in cable risers 1" TFL tops

OPTIONAL EXTRAS

- Below desk power complete with flip unit
- In-surface power unit
- Flip in-surface power unit

PERFORMANCE STANDARDS

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

While recycling is the element which

receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

**REDUCE
REUSE
RECYCLE**
