

COLAB

CoLab creates agile, adaptable environments for dynamic learning, socializing, and collaborative work. The system provides freedom and flexibility to reconfigure spaces to meet the changing needs and modalities of groups, unlocking real estate potential by making space intelligent through social collaboration.

By creating multiple relaxed and informal learning environments – creative hubs, quiet nooks, social labs, team touchdowns – CoLab expands the classroom beyond the conventional solid four walls, into the café, library, atrium, corridor, or common room to encourage students and teachers to engage in open discussion and collaboration after more conventional and formal teaching.
